

# your revenue cycle is trying to tell you something.

Get an eye-opening view of your operations and visualize the path to higher revenue and lower cost to collect.

It used to require slow and costly over-the-shoulder consultation to measure staff effectiveness. With the Janus Health **Operational Intelligence** suite of solutions, it's easy to see the most profitable path forward.

## Operational Intelligence suite

### Workforce Management

*Uncover inefficiencies to boost performance*

Assess team and individual productivity and effectiveness by harnessing comprehensive insights.

### Process Intelligence

*Identify processes that need agile reimagining*

Enhance efficiency across departments by identifying and addressing process variations that may divert your team from its course.

### Denial Insights

*Proactively identify and prevent denials*

Uncover underlying denial trends to enable proactive measures upstream, addressing issues at their source.

## Key features

Compare **workflow data to outcomes** across teams, systems, and applications.

Pinpoint where **process variation** slows down your team and causes inefficiencies.

Quantify that process refinements and automations are **delivering results**.

Visualize workflow, outcome, and denial data through **actionable dashboards**.

By exposing **process variances** and uncovering the most **effective workflow**, Operational Intelligence solutions identified potential annual savings of **3,150 hours** and the opportunity to **reduce timely filing denials** for a large California health system.

Operational Intelligence is just one part of the Janus Health platform. We offer automation and intelligence solutions to optimize your entire revenue cycle.

transform your operations with us.
